

## **Sterling Computers Named a 2018 Tech Elite Solution Provider by CRN®**

List Recognizes Providers with Premier Certifications and Deep Technical Expertise

**Dakota Dunes, SD, April 24th, 2018** – Sterling Computers Corporation, an industry-leading technology solutions provider, announced today that CRN has named Sterling to its 2018 Tech Elite 250 list. This annual award honors an exclusive group of North American IT solution providers that have earned the highest number of advanced technical certifications from leading technology suppliers, scaled to their company size.

“We’re honored by this recognition, as it speaks to the efforts and commitment of our employees,” said Brad Moore, President and CEO of Sterling. “Because of their ongoing pursuit of professional growth, Sterling is able to offer an unmatched level of excellence and technical expertise.”

To compile the annual list, The Channel Company’s research group and CRN editors work together to identify the most customer-beneficial technical certifications in the North American IT channel. Companies who have obtained these elite designations—which enable solution providers to deliver premium products, services, and customer support—are then selected from a pool of online applicants.

“Being named to CRN’s Tech Elite 250 list is no small feat,” said Bob Skelley, CEO of The Channel Company. “These companies have distinguished themselves with multiple, top-level IT certifications, specializations, and partner program designations from the industry’s most prestigious technology providers. Their pursuit of deep expertise and broader skill sets in a wide range of technologies and IT practices demonstrates an impressive commitment to elevating their businesses—and to providing the best possible customer experience.”

Coverage of the Tech Elite 250 will be featured in the April issue of CRN and online at [www.crn.com/techelite250](http://www.crn.com/techelite250).
